

MATHS DAY ACTIVITY

CLASS - VIII

LEARNING IS THE OUTCOME OF AN ACTIVITY AND IT IS ALSO DEVELOPED VIA ACTIVITY.

In Mathematics, we have come across different types of geometrical illusions. Geometrical-optical illusions are visual illusions, also optical illusions, in which the geometrical properties of what is seen differ from those of the corresponding objects in the visual field. In understanding geometry, various activities can be carried out which strengthen the geometrical imagination by modelling with the help of paper. So let's do something creative.

Students of class VIII have to make some colorful geometrical illusions
The different themes for this activity is as follows:

Class VIII A: Line illusions

Class VIII C: Circle illusions

Class VIII E: Rectangular illusions

Class VIII B: Cube illusions

Class VIII D : Square illusions

- Activity has to be done on A4 size sheet.
- Submit your activity on 21 December, 2021.
