Notice

“We need nature more than nature needs us. It should be looked upon with awe and humility.”

World Earth Day is celebrated on 22 April every year with the aim to build the world’s largest environmental movement which involves transformative change for people and the planet. It is celebrated to sensitize the nation about promoting clean living and a sustainable habitat for people.

To mark the occasion of Earth Day, BBPS is conducting several activities for classes IX & X.

Class IX & X -Virtual Holiday

Virtual Holidays are a great way to enjoy the scenery without the environmental cost of flying. Students will consider the places that they want to visit, to showcase some of the most beautiful scenes Earth has to offer. For example

“Climbing Mt. Everest”

“Find the secrets of ancient ruins”

“Explore the Antarctic Landscape”

Class IX students will draft a report in a scrap book highlighting their observations.

Class X students will make a powerpoint presentation of any two pieces of evidence of virtual holiday.
